

How Limina Helps Clients Generate Operational Alpha

Challenges

Our Solution

How Limina's Investment Management System can help you
Increase Performance
by Reducing Cash Drag

Features That Enable Lower Cash Drag

- 1 Forward-looking cash & exposure simulation as part of order-raising
- 2 Real-time, complete cash and position data (no FX or cash missing)
- 3 Trustable data, thanks to automatic data quality controls

How do I decrease cash drag?

You can decrease cash buffer by knowing your exact exposures and cash today, T+1, T+2, etc – both from a settle date and trade date perspective.
